

MediTract Aceoffix 5.8 Upgrade Instructions

Your organization currently uses a plugin called Aceoffix, which facilitates in-browser editing of Word documents within Process Manager.

The version of Aceoffix that your organization is currently using is only compatible with Internet Explorer. In order to continue editing and reviewing documents in Process Manager or Contract Collaborator, your organization must upgrade Aceoffix to version 5.8 on each workstation as soon as possible. Please note that despite the support of additional browsers, Aceoffix will still only work in a Windows environment.

Ready to get started?

- Click on the link below to access the Aceoffix 5.8 MSI file:
<https://mt1-public-storage.s3.amazonaws.com/plugins/pluginsetup5.8.0.2.msi>
- Execute the file by silent download or individual workstations, whichever you prefer.
- Upon completion of the above, notify MediTract via helpdesktm@symplr.com so that we can activate version 5.8 in your MediTract database.

For assistance, contact the Helpdesk at 1-855-527-9669 or helpdesktm@symplr.com.
