

# Aceoffix Upgrade Instructions

Your organization currently uses a plugin called Aceoffix, which facilitates in-browser editing of Word documents within Process Manager.

The version of Aceoffix that your organization is currently using is only compatible with Internet Explorer. Because of this, we recommend that your organization upgrade to the latest version, which will allow MediTract users to complete workflows in Chrome, Firefox, and Edge (as well as Internet Explorer 11).

(Please note that despite the support of additional browsers, Aceoffix will still only work in a Windows environment.)

## Ready to get started?

- Click on the link below to access the Aceoffix 5.7 MSI file:  
<https://mt1-public-storage.s3.amazonaws.com/plugins/pluginsetup5.7.0.1.msi>
- Execute the file by silent download or individual workstations, whichever you prefer.
- Upon completion of this, notify MediTract so that we can activate the new version in your MediTract database.
